# AMTSystems Commitment

## To Our Valued Customers

Since our inception in 1988, AMTSystems has prided itself on supplying mobility and identification solutions to the Healthcare and Horticulture markets. AMTSystems successfully partners with industry-leading manufacturers of labeling products, printing solutions, barcode scanning, mobile computing and RFID technologies, which allows our company to offer the right solutions for you, our customers. Whether it's a need for tags, pressure sensitive labels, printing systems, signage, barcode scanners or a complex mobile inventory solution, AMTSystems has the experience and staff available to help improve your business.

**AMTSystems Horticultural Tag and Labeling Division** published this Product Reference Guide to assist you with the purchase of our

products and services. Our Northeast Region location in the town of Cheshire, also known as "The Bedding Plant Capital of Connecticut", is an ideal location for AMTSystems and a primary reason we service greenhouse growers, nurserymen, and garden centers with waterproof identification products. Being part of a horticultural community, we interact daily with our customers keeping up with developing trends and the needs of the green industry. We hope you find this publication helpful and please keep in mind that new products are added frequently based on customer requests. If you don't see a product shown, please ask for it. Your Horticultural Sales Team knows how to fill your request and most important is our commitment to you. **"Our Job is to Work for You Providing the Best Products at Affordable Prices."**

If you need labels and tags in large quantities, please discuss contract pricing with your Horticultural Sales Team member. We will establish an annual program where you can purchase tags and labels throughout the year based on your contract level. By "pre-booking" your tag and label orders, you allow us to manage our tag and label inventory so we can service you better.

The following colors are provided by color code for ordering purposes and the codes are provided in the tag and label sections based on the colors available for that product. (Please note that the colors vary slightly due to the printing process used for this product reference guide.)

**WE CAN PRINT TAGS AND LABELS FOR YOU.** Many of our customers ask us to preprint their name and logo on the backs of their tags. Some customers also ask us to assist them with their printing needs to accommodate large volumes or when their volume does not justify the purchase of a printer. Our Preprint Department prints millions of labels per year and would like to preprint labels for you.

**For your convenience, we accept Visa, Master Card, American Express, and Discover Card. We also ship COD via UPS. \$100 minimum order policy in effect.**

## Custom Color Tags

# The Sunrise Series

## Stock Inventory Tags/Custom Tags

AMTSystems and our printing partners have developed a new and exciting tag series called The Sunrise Series. This exciting new series contains four unique tags developed to maximize your plant marketing and tag program effectiveness. You will notice that each of these sizes has that special and unique "sunrise" look and feel. The entire series has smooth, clean lines and an expanded area for your plant's picture. Made with sturdy, weather-resistant polystyrene plastic and printed with fade-resistant UV inks, these tags are designed to hold their look and feel throughout the life of your program.

### Sunrise

**Grand 2.125" x 6.75"**

**Popular 2" x 6"**

**Intermediate 1.75" x 4.75"**

**Petite 1" x 4.25"**

### Bilingual

In addition to offering superior visual impact, the Sunrise Series tags are helpful and informative to a variety of buyers. Our directions for care and use, as well as our meticulous attention to detail in delivering these instructions, ensure that the consumer is well informed. Good information leads to a greater level of customer satisfaction.

Our stock inventory tags are bilingual, including both English and Spanish.

Printed in large, clear, black type, our "Plant Characteristics" are easy to read and accurately reflect the necessary attributes for planting and care instructions. Additional, universally accepted symbols are provided to further clarify the instructions, in appreciation of your diverse customer requirements.

### Hanging Basket Tags

Our hanging basket tags come in 2 sizes, Popular (2.25" x 4.5") and Grand (2.25" x 5.25"). The unique, patented EZ-I slot allows you to easily place the tag over the plant hanger, while ensuring that it stays just at the proper position on the hanger. Customize your tags, or order from our convenient inventory.

### Nursery Tags

We offer an exciting and useful line of nursery tags in 2 distinctive sizes, Popular (3" x 4") and Grand (2.875" x 6.125"). All our nursery tags include prepunched holes for ease of use when attaching with wire, twist ties, clips, or tagging guns. Tags are available with a 3" loose loop tie with 100% stretch characteristics. Beautifully illustrated and printed, our distinctive line of nursery tags is sure to be a valuable asset to your plant marketing program.

# Thermal Printers

AMTSystems offers a complete line of top quality thermal printers from Toshiba (TEC) Corporation and Zebra Technologies Corporation.

## THERMAL TRANSFER PRINTERS

The **Toshiba thermal transfer printers** print on outdoor, waterproof tags and labels suitable for the horticulture industry. The printers come in four models. Two models are available with 4" print heads and two models are available with 5" print heads. All models feature "wide open" configuration with easier tag and ribbon loading and better access to internal parts allowing the operator to clean and maintain the printer comfortably. The 4" printer models deliver quality printing at 203 dpi, just right for printing barcodes and text. The 5" printer delivers higher quality printing at 300 dpi improving the printing of barcodes, graphics, and logos. The printers have a full floating print head which provides a light and heavy pressure setting to print pressure sensitive labels at .010 mil, nursery tags at .012 mil, and pot tags up to .024 mil thick. The narrow chassis version can accept pot tags up to 5" wide. The wider chassis printers with fully adjustable tag and label guide plates prevent telescoping with the larger tags. Standard features include Parallel Port, Serial Port, and Ribbon Saver Technology. Optional USB and Ethernet connectivity are available.

## ZEBRA PRINTERS

Are you looking to print pressure sensitive labels on demand? The Zebra family of thermal transfer printers has served the horticultural industry for years.

The **Zebra 140XiiiPlus printer** is known for high performance, mission-critical ruggedness, steel construction, superior connectivity, and printing speeds up to 12" per second at 203 dpi. This hardworking printer is the one to call on for heavy duty horticultural printing when 24 hour duty cycles are required.

Form follows function in this simple to operate **Zebra Z4MPlus** die cast metal thermal transfer printer. The Z4MPlus is an excellent choice when a rugged, competitive, mid-range solution, cost effective flexibility with 203 dpi and print speeds up to 10" per second for labeling your horticultural products. Optional 300 dpi available with print speeds up to 6" per second.

Designed for the budget minded, the **Zebra S4M** has the features needed to support the horticultural industry at an affordable price. With easy controls and proven side loading design, it is quick to learn to use through a streamlined front control panel so operators can focus on more productive tasks. Its metal construction, ability to handle a full 8" media roll, print speeds up to 6" per second, and choices of 203 dpi and 300 dpi makes the S4M an outstanding value.

The **TLP2844 barcode label** printer is ideal for applications requiring a space saving printer. It also can be programmed to work as a stand alone printer with a key display unit (KDU) without being connected to a computer. The TLP2844 has a double walled ABS casing, print speeds up to 4" per second, 203 dpi and maximum supply core of 5" O.D. An excellent value when a pricing label printer is required at a garden center.

# Color Printers

AMTSystems has worked with Lexmark Corporation to source color laser printers that print signs and tags that will withstand harsh outdoor environments that are typically found in the horticultural industry.

## COLOR LASER SIGN PRINTER

The **Lexmark Color Laser Printers** offer garden centers and nurseries the ability to print color plant signs at very affordable prices. Use your imagination! Add your name, logo, care instructions, compliance information, and price to your signs. Let your signs become your silent salesperson. Reduce your sign costs by printing color signs inhouse on demand. You can show your customers just how the plants will look in their garden, whether the plants are in bloom or not. Growers can print tags with colored plant pictures, plant care instructions, bar codes, garden center name and address, compliance information and price. Now you can get all your color plant signs and tags done quickly and, more importantly, exactly the way you want them to look! Laser signs stock sizes are available to fit the standard sign holders. Hang tags are available in several sizes. The Lexmark Color Laser Printers give high quality color printing, excellent performance, versatility, and reliability. Remember, COLOR SELLS. Talk to us to discuss your application and determine which Lexmark Color Laser Printer is right for you.

## PRINTER ACCESSORIES

### Printer Ribbons

AMTSystems carries a complete line of ribbons for TEC (Toshiba) and Zebra printers.

### MC-11 Rewinder

Quality, low-cost Rewinder & Unwinder, coreless or cores up to 4".

### Labelview Labeling Software

The perfect label software program available for designing labels with your thermal or laser printer.

### Print heads

AMTSystems carries printheads for all TEC (Toshiba) and Zebra printers.

### Protective Printer Cover

Protect your printer from dirt and dust with a heavy duty vinyl case.  
9141997 - Wide version  
9141998 - Narrow version

### Automatic Label Applicator

Compact Labeling Applicators are versatile, reliable, accurate, and easy to use. The unit can apply a variety of horticultural label sizes at speeds up to 100 feet/minute.

# Signs

For your convenience a complete selection of signs, sign holders, markers, injected molded stakes, sold tags and fasteners for all applications are available.

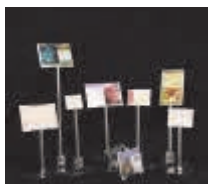

## SIGNS

**Thermal Signs** 5" x 7" , 4" x 5"

**Laser Signs & Color Laser Signs** 7" x 10" for 2(5" x 7"), 7" x 11", 8" x 10", 8.5" x 11"

**Utility Signs** 5" x 4", 7" x 5", 11" x 7", 8" x 10" in 15 Mil Vinyl or 30 Mil Styrene, Available in Blank, Tree & Shrub Classified, Special, Sale

## SIGN HOLDERS

**Galvanized** 5" x 4", 7" x 5", 11" x 7", 8" x 10" leg lengths available 18", 30", 36", 42" Bases 2 lb, 3 lb

**Plastic** 7" x 5.5", 11" x 7", 8" x 10" 18" or 24" Stake & 10" x 10" Base, Black or Green

7" x 5.5", 11" x 7", 8" x 10" leg extends 18"- 30", 10" & 10" x 10" Base, Black or Green

**Parker Davis** 7" x 5.5" Card, Choice of 8", 16" or 32" Stake, White or Colored Cards

## MARKING PENS

Black Horticultural Marking Pen, China Marker, Posterman Pen in 8 assorted colors

## INJECTED MOLDED STAKES

**Standard Face** 2.25" x 1.5" Leg 4.5", Face 3.75" x 2.25" Leg 7" or 10"

**Angled Face** 3" x 2" Leg 6", Face 5" x 3" Leg 8", Face 4" x 2.5" Leg 14", Face 6.25" x 4" Leg 17",  
Blackboard Face 4" x 2.5" Leg 14", Blackboard Face 6.25" x 4" Leg 17"

## SOLD TAGS

4" x 2.25" Red/Black Print, 4" x 2.25" Red/Black Print with wire, 3/4" x 7" Red/Black Print or White/Black Print, 1" x 10" White/Red Print

## FASTENERS

Hog Ring 9/16" Ringer & 9/16" Rings, 11/16" C Ring Tool & 11/16" Rings

Laser II & Mark III Tag Gun, Needle Replacements, 1/2" & 1" Paddles, 1/2" T-Fasteners

5" & 9" Secur-A-Tie, 7" Bar-Loc Black & Natural, 5/32" x 7" or 10" Green Plas-ties

5/32" x 7" Permanent Locking ID Tags in wh, ye, re, gr, or, bl

# Promotional Printing

Let us help you design and print catalogs, loyalty cards, signage, banners, and pot wraps. Need marketing help.... We are only a phone call away.

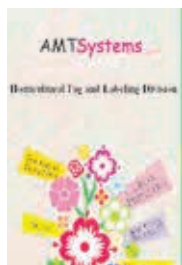

## CATALOG DEVELOPMENT

Let AMTSystems develop and print your company's catalog.

## CUSTOMER LOYALTY CARDS

Increase sales through a customized "Customer Loyalty Card" program. Cards include: 4 Color printing on front, card layout with company logo and/or photo, barcode, address of facility, telephone and fax #. Cards are 30 Mil plastic.

## CUSTOM SIGNAGE & BANNERS

Create your own LOOK! Custom signage, directory signs, banners, (indoor and outdoor), bench wraps, posters, promotional post cards, etc.

## TRUNK MATS

SIZE	PART #	MAT TYPE	QTY/ROLL
29 x 53	9140376	Tree Mat	300
29 x 53	9140378	Flower Mat	300

## POT WRAPS

Pot Wraps...It's all about Marketing...and color sells...

Add consumer appeal to any container with colorful pot wraps. The pot wrap is a unique way of marketing a product or program adding extra weeks of selling time for a plant before and after the plant is in bloom. The pot wrap provides ample space for color and opportunity for brand recognition. Plant care instructions, garden layouts, companion plantings, coupons, and other information can be printed on the inside of the plant wrap. Full wraps and half wraps are available to fit most sizes of pots. Call today for information about how pot wraps can help you get additional dollars from your plant sales.

# Bar Code Products

A complete offering of bar code scanning, mobile data collection, wireless communication and RFID products are available.

## WIRELESS COMMUNICATION

AMTSystems integrates mobile computing, wireless networking and data capture allowing nurseries and greenhouse growers to track crops and sales like never before. Field information, such as inventory, sales, plant growth, fertilization and pesticide applications, can be transmitted wirelessly direct to the company's office computer system for further processing. The hand-held devices are lightweight, rugged and features an easy-to-read, back-lit display. The hand held computers are easy to use and gives access to pertinent information necessary for managing your business. ROI— Return on your investment will typically be less than one year. Improvements in work flow and employee productivity are greatly enhanced through the use of these technologies.

## PDA

Designed for mobile horticultural workers and managers who require a rugged, high performance, hand held computer for durable and reliable operation. Versatile features support broad systems deployments, including ample memory capacity, USB client, wireless communications, color graphics, etc. PDA wireless units are capable of transmitting sales from the field to the office for processing, allowing sales personnel to continue helping other customers, without coming back to the office. Hand held computers can be used to determine what plants are available for sale. Upon examining the plants, locations, and plant growth, the PDA can scan the plant's barcode, the location barcode, and scan the plant growth status, i.e., ready, flowering, budding, etc. Captured data can then be uploaded to a PC and made available on your web site for use by your customers.

## RFID

Radio Frequency ID labels and tags can store data on a microchip embedded inside the tag for quick reference by your staff. Data recorded can be reviewed by reading the RFID tag stored outside in the field using a hand held computer. Examples of data recorded are: planting dates, soil conditions, pesticide treatment, herbicide applications, and other services performed. New information can be easily written to the RFID tag outside in the field. Work order creation and verification of work assignments can be automated, further reducing the time spent on manual recordkeeping. Data captured for pesticide treatment can be used to prepare state pesticide reports.

## BAR CODE SCANNERS

AMTSystems offers bar code scanners that have been developed to provide optimized reading performance through excellent ergonomic design and a natural reading approach. Cordless industrial laser guns are also available.

Bar code verifiers are available to spot check bar code labels printed on thermal printers to insure label printing compliance for your chain store customer.

# Custom Software

AMTSystems offers our customers computer software programming solutions as well as hardware support.

## CART-TRAX SYSTEM

The **CART-TRAX System** is a unique tracking system to control cart inventory in the horticultural market. The CART-TRAX system eliminates the problems that wholesale growers have in trying to determine which customers have their carts and how many they have? With CART-TRAX, you can control cart inventories and track plant carts simultaneously. A metal tag with a unique numbered bar code and nursery name is placed on each cart. Once a database of cart numbers and customers are assigned a bar code ID, all that is required is to simply scan the metal tag prior to loading carts into trucks. Knowing exactly where all of your carts are can save you thousands of dollars in lost or misplaced cart inventory every year.

## GREEN-TRAX DATA BASE SOFTWARE

A new database software system for plant information that allows garden center employees and customers to look up plant descriptions and pictures for educational purposes. The database of over 8000 plants can be searched by common or botanical name on the garden center computer. A kiosk can be set up with a computer and printer so the garden center customers can print out care instructions and pictures for the plants they are purchasing. Plant information and pictures can be added or edited by the garden center. The software is designed to allow a garden center to produce their own catalog of selected plants, information sheets and signage. A demo disk is available.

## CONSULTING SERVICES

AMTSystems Technical Staff can help you assess your current and future computer hardware requirements, local area network support, and computer system. Training services are available for Internet use, computer software, and network administration. Our programmers write custom software to track inventory, sales, product, and plant information using handheld computers. On-site technical support is available. Ask us about these services and how they can improve your business.

## WEB-ENABLE ORDER ENTRY

Designed for the Horticultural Industry, Web-Enabled Order Entry service integrates the latest technology in communications allowing customers to place orders directly to you via the Internet. This program saves you and your customer time by providing availability of plants in stock and other promotional items, product pricing, order confirmations and invoicing.

## UPC CODES

We will gladly help answer any questions about UPC codes.

# POS System

**AMTSystems offers Point of Sale, Inventory, and Wholesale Tracking Software**

## **GREEN-TRAX POINT OF SALE SYSTEM**

An inventory and point of sale system designed for garden centers, nurseries, and landscapers. Now you can organize your point of sale system and inventory control system into one integrated package. The Green-Trax POS system for PC use is a fast, dependable, easy to read, yet extremely powerful Point of Sale system. Green-Trax was specifically designed for garden centers and nurseries looking to replace or upgrade their current POS or cash register systems. The Green-Trax system allows the sales staff to ring up sales like any cash register, but more importantly, gives the owners the ability to control both the sales and inventory functions. Using bar code technology, your staff can make sales more quickly and be more accurate... Saving thousands of dollars in lost revenue due to human error. Features include item discounting by dollar and percent, split payments and sale suspension allowing the next person in line to be served. The POS computers can be a single, stand-alone PC or part of a series of PC's for multiple work stations.

The Green-Trax Systems Manager located on a computer in the back office maintains all the item information, vendor information, and customer information which includes a customer loyalty program. File transfers are made between the Systems

Manager PC and the POS computers at least once daily. The Systems Manager is password protected and can only be accessed by an authorized person thereby securely controlling all information files. The system maintains a history of all sales and reports are generated by day, week, month, or year. Management is able to generate reports by sales person, customer, item, categories, profitability and a whole lot more.

## **GREEN TRAX INVENTORY & WHOLESALE TRACKING SYSTEM**

AMTSystems has developed additional Green-Trax Inventory products for greenhouse growers and nursery wholesale yards. Using the Green-Trax Systems Manager as the base. Green-Trax Inventory System can track inventory and locations for growers of plugs or plants. Planting of plugs are tracked via hand held computers collecting data to pay employees by the piece. Plugs are tracked during their growing cycle by status and location. Green-Trax Inventory & Wholesale System allows wholesalers and growers to perform various functions both on PC's and mobile computers. Orders can be processed creating pick lists, packing lists, and invoices. Purchase orders are created to replenish plants and to receive plants against the purchase order file. Physical inventories can be conducted by item count. Label printing has been integrated. Customer and vendor information is maintained. The system provides a history of all sales and reports may be generated by day, week, month, or year.

Let us customize a version for you...
